2017 Community Health Indicators: Blood Pressure

Introduction

The inaugural Community Health Indicators Report was commissioned by Greater Rochester Chamber of Commerce and compiled by Rochester RHIO, and provides a glimpse into residents' well-being across 13 counties: Allegany, Chemung, Genesee, Livingston, Monroe, Ontario, Orleans, Schuyler, Seneca, Steuben, Wayne, Wyoming and Yates.

This population health study is based on analysis of clinical data managed by Rochester RHIO, the region's trusted health information exchange. This report summary is available at rochesterrhio.org, with full report data planned to be made available this summer.

Four key health measures were assessed using full-year 2017 anonymized data, with a total sample in excess of 600,000 screenings:

- Body Mass Index (BMI): 181,310 patients screened
- Blood pressure: 147,116 patients screened
- Diabetes Risk (HbA1C): 236,751 patients tested
- Smoking Status: 72,484 patients screened

Blood Pressure Definitions (Global Blood Pressure) 1 of 4

HTN = Hypertension (Also known as having a high blood pressure diagnosis).

About Us

What is health information exchange?

The service allows a medical care team to share records across institutions and practices, making patient information available wherever and whenever needed to provide the best care. Patients benefit from fewer repeated tests, easier second opinions, a reduced risk of mistakes caused by poor handwriting or incomplete records, and more informed care during office visits and emergencies. Rochester RHIO is a fully accredited Qualified Entity of the Statewide Health Information Network of New York (SHIN-NY). Health care professionals and patients can learn more by visiting RochesterRHIO.org, or by calling 1-877-865-7446 (RHIO).

About Us

Rochester RHIO is a secure electronic health information exchange serving authorized medical providers and 1.4 million residents in Monroe, Allegany, Cayuga, Chemung, Genesee, Livingston, Ontario, Orleans, Schuyler, Seneca, Steuben, Wayne, Wyoming and Yates counties in upstate New York.

Clinical data in this report included all counties mentioned except Cayuga.
