Email resumes to: careers@grrhio.org

As the trusted data steward for secure health information exchange, Rochester RHIO is one of the most respected, trusted and successful health information exchanges in the United States. Rochester RHIO serves 14 counties in the greater Finger Lakes Region and 1.5 million residents. At Rochester RHIO, we love connecting with talented people who get excited about making a difference in patient care with health data.

Rochester RHIO requires all employees to comply with the company's COVID-19 vaccination policy upon hire. Please include 2-3 job references with your resume.

Key Responsibilities: Other duties may be assigned.

- Provide data analysis support for Data Quality initiatives and Secondary Use projects, including the following activities*:
    - Analyze business requirements;
    - Identify code sets for relevant data;
    - Develop report requirements;
    - Validate results;
    - Aggregate data to address project needs; and
    - Communicate with all parties to ensure consistent interpretation of deliverables.
- Have a clear understanding of HL7 V2.x, C-CDA 1.1 and 2.1, and X12 claims standards*
- Recommend innovative ideas, processes, and/or procedures for enhancements, additions, and modifications to improve existing data in the Health Information Exchange (HIE)
- Serve as a resource for daily operational issues within the HIE related to clinical data or workflow
- Act as a liaison between Clinical, Community Services, and Technical resources
- Develop strategies and best practices to incorporate into future HIE policies and procedures
- Monitor for and report on data quality issues from Data Sources or within the HIE
- Promote the mission, vision, and values of the organization

Required Skills and Abilities include the following:

- Comprehensive experience in Data Science*
- Good understanding of HL7 V2.x, C-CDA 1.1 and 2.1, and X12 claims standards*
- Excellent Clinical Data Quality Analysis skills*
- Familiarity with Clinical Quality Measures*
- Proficiency in tools and technologies used in data quality, including Excel and other Microsoft products*
- Good communication skills
- Clinical research background is helpful
- Accustomed to database models
- Understanding of big data concepts
- Willingness to learn

Education/Experience

Bachelor's degree (B.A./B.S.) from four-year college or university; and five to ten years related experience and/or training; or equivalent combination of education and experience; Clinical licensure or certification (RN, Medical Technologist [MT]) is strongly preferred.

Knowledge, Skills and Other Abilities:
- Ability to understand clinical coding systems (LOINC, SNOMED)
- Basic HIPAA background

More About the Company: Health information exchange services allow a medical care team to share records across institutions and practices, making patient information available wherever and whenever needed to provide the best care. Patients benefit from fewer repeated tests, easier second opinions, and a reduced risk of mistakes caused by poor handwriting or incomplete records, and more informed care during office visits and emergencies. Rochester RHIO is a Qualified Entity of the Statewide Health Information Network of New York (SHIN-NY), and was founded in 2006. You can learn more at https://rochesterrhio.org.

Rochester RHIO is an equal opportunity employer, and we celebrate diversity at our organization.
